PROFESSIONAL EXPERIENCE

AV Technician | Guckenheimer Services, Client: Riot Games **2022–2026**

- Provided onsite technical support for live events, meetings, broadcasts, studio productions, and theater spaces serving employees, Communications teams, Product teams, and executive leadership.
- Diagnosed and resolved issues involving recording PCs, graphics workstations, displays, cameras, microphones, audio mixers, teleprompters, confidence monitors, lighting systems, and connected production hardware.
- Configured and operated Microsoft Teams, Zoom, Webex, TriCaster, OBS, vMix, NDI, and SDI workflows for town halls, livestreams, recordings, and hybrid events.
- Performed pre-event system checks, signal verification, equipment setup, routine inspections, and preventive maintenance to reduce downtime and keep production spaces ready for use.
- Maintained organized equipment storage and supported inventory awareness for cameras, tripods, microphones, cables, adapters, and related peripherals.

Space Occupancy Assistant and Data Entry Specialist | Bogaard Group International/ Guckenheimer Services, Client: Riot Games **2018–2022**

- Maintained accurate digital records for employee seating, team locations, building updates, room information, and campus assets across a large workplace environment.
- Created and updated Google Sheets using formulas and Google Apps Script to improve data consistency, logistical planning, and space-utilization reporting.
- Produced digital wayfinding maps and maintained campus display information in Robin, helping employees locate teams, rooms, and workplace resources.
- Coordinated with cross-functional teams on moves, space changes, documentation updates, and occasional video-production support while protecting data accuracy.

DTG Production Shift Manager | Printful **2016–2018**

- Led day-to-day production operations, investigated machine and digital-file issues, and coordinated corrective action with art and production teams.
- Created end-of-day reports, tracked production metrics, documented procedures, and maintained quality-control standards across high-volume workflows.
- Developed repeatable operating procedures that were adopted across multiple facilities and trained team members on consistent production practices.

EDUCATION AND TRAINING

Graphic Design, Platt College | Photography and Videography Certificate, West Valley Occupational Center
